Education

Berklee College of Music, Valencia Campus — Valencia, Spain
Master of Music in Music Production, Technology, and Innovation — *Aug. 2025– July 2026*

California Polytechnic State University, San Luis Obispo — San Luis Obispo, California
Bachelor of Science in Computer Science, Minor in Music — *Aug. 2021 – June 2025*

Experience

Software Developer - AI Trainer — October 2026 – Present
Data Annotation — *Remote*
- Evaluate and compare LLM responses to coding prompts in Python, JavaScript, and C++, rating each for completeness, accuracy, and code quality
- Design challenging coding prompts that probe model reasoning across multiple languages and problem domains
- Write, debug, and test reference solutions to programming prompts spanning data structures, algorithms, and web development

Software Development Intern — June 2024 - Sept. 2024
RadWatch — *Berkeley, CA*
- Automated the process for collecting and standardizing format of weather and radiation data from detectors across the world using Python, PHP, and MySQL
- Stored results into a new SQL database localized on the website server, and generated graphs based on realized data patterns
- Owned project management life cycle throughout system design development, task organization, and ideation for future use and optimization
- Practiced thorough documentation, error-handling, formatting and information pipeline efficiency

Projects

Surround Vocal Spectrum Visualizer | *C++, JUCE, AU/VST3/AAX, CMake, Git* — January 2026 – July 2026
- Developing a C++/JUCE audio plugin that visualizes track positioning and gain in 5.1 surround space for intuitive spatial mixing
- Implementing real-time DSP (FFT-based analysis) to extract and display frequency and amplitude data across multi-channel inputs
- Designing a low-latency, DAW-integrated workflow for analyzing grouped vocal stems, improving clarity, balance, and spatial coherence in dense mixes

E-Commerce Potion Shop | *Python, FastAPI, PostgreSQL, SQLAlchemy, Supabase, Git* — May 2024 – June 2024
- Developed dynamic product catalog to optimize prices from real-time demand fluctuations, requiring pattern matching and script scalability
- Implemented dictionary and map-based inventory management scripts using python and MySQL to track raw materials and sellable good supply as well as financial resources, completing 6th out of 67 participants

Leadership Experience

Music Director, Arranger & Producer — September 2022 – June 2025
Take It SLO A Cappella — *San Luis Obispo*
- Led bi-weekly rehearsals, directing vocalists in tone, blend, dynamics, and articulation to achieve a cohesive, performance-ready ensemble sound
- Arranged and produced original and adapted works, translating musical concepts into structured vocal arrangements for live and recorded settings
- Directed recording projects, overseeing tracking, vocal editing, and mixing workflows, contributing to releases featured on curated playlists (100k+ followers) with 150k+ streams

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL (MySQL, PostgreSQL), PHP, HTML/CSS
Frameworks: JUCE, React, Next.js, Node.js, FastAPI
Developer Tools: Git, CMake, Docker, VS Code, Visual Studio, Xcode
Libraries: pandas, NumPy, Matplotlib, SQLAlchemy
Audio: Pro Tools, Logic Pro X, Ableton Live, MAX/MSP, Dolby Atmos, AU/VST3/AAX plugin formats
